

Defining Values - Explore!

```
(define shape1 (triangle 50 "solid" "red"))
```

Type the line of code above into the Definitions window of a new WeScheme program, and press "Run".

What happens when you enter `shape1` into the Interactions window?

A solid, red triangle appears.

Brainstorm some other pieces of code to define. Use the space below to draw any Circles of Evaluation you need and to organize your thoughts.

Ideas: `eye-color` (a String), `age` (a Number), `fav-shape` (an Image)

```
(define eye-color "brown")
```

```
(define age 12)
```

```
(define fav-shape (star 65 "solid" "purple"))
```
