Defining Values - Practice

Write the code to define `PRIZE_STAR` as a **solid, green star of size 50.**

Using the `PRIZE_STAR` definition from above, draw the Circle of Evaluation and write the code for each of the exercises. One CoE has been done for you.

A solid, green star that is 3 times the size of the original (using scale)	A solid, green star is half the size of the original (using scale)
scale 3 PRIZE_STAR	
A solid, green star of size 50 that has been rotated 45 degrees	A solid, green star that is 3 times the size of the original **and** has been rotated 45 degrees

How does defining values help you as a programmer?
